-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 February 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tung et al. (US 20030108702) in view of (JP 11-80555, English translation provided by applicant).

Tung discloses a stretched bottle from a film-forming polymer of PET copolymer copolymerized with isophthalic acid comprising an oxygen scavenging composition iron particles wherein the bottle is transparent and has a hunter haze value of 20% or less and a thickness of 279.4 micrometers (page 8, paragraph [0080]).

Tung fails to disclose iron chloride deposited on the iron particles from ethanol which is essentially moisture free and the oxygen scavenging composition is present at a concentration of 100 parts by weight of the container.

JP 11-80555 discloses iron chloride deposited on the iron particles from ethanol which is essentially moisture free (since ethanol and acetone are essentially moisture free) and the oxygen scavenging composition is present at a concentration of 100 parts by weight of the container (paragraph [0009], [0016], [0021], [0026], [0028], [0030]) in a container for the purpose of providing improved oxygen scavenging properties.

Therefore it would have been obvious to one of ordinary skill in the art at the time applicant's invention was made to have provided iron chloride deposited on the iron particles from ethanol which is essentially moisture free and the oxygen scavenging composition is present at a concentration of 100 parts by weight of the container in Tung in order to improve oxygen scavenging properties.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Miggins whose telephone number is 571-272-1494. The examiner can normally be reached on 1:00-10:00pm.
